

## Unified Collections

### Delivering Centralized Control, From End to End

Banish outdated systems that are holding you back. Synchronize your collections strategy and communications while connecting with your past-due customers. And do it all with clear visibility into every touchpoint.

### Take Control of Your Collections, in a Single Location

Katabat™ Unified Collections provides you with a centralized enterprise collections platform and 360-degree customer view. It's everything you need to manage pre charge-off collection activities, communications, offer treatments, and agent interactions. Address all stages of collection management, digital collections, and debt placement on a single, integrated platform.

### ROI, Fast

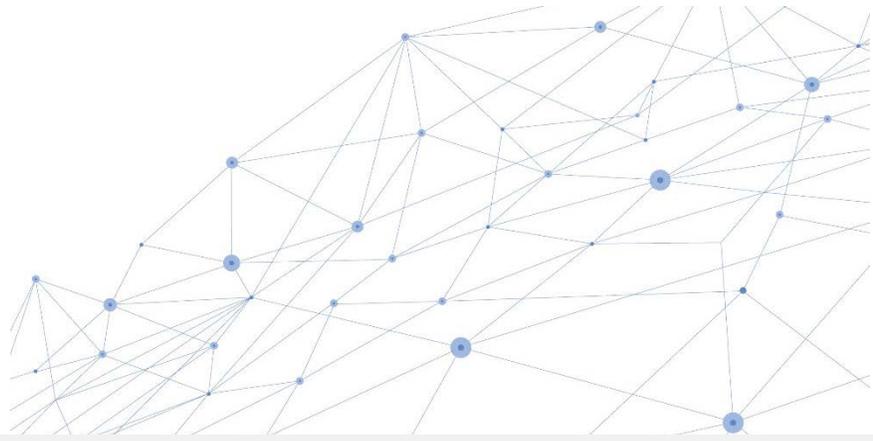

A central component of the comprehensive Katabat™ Restore collections and debt management solution, Unified Collections has proven its value at companies both large and small across the globe. SaaS deployment ensures quick implementation to accelerate your ROI. Our managed services team keeps your solution up to date, freeing your IT department.

### The Highlights

If you're in a hurry

- 360-degree view of the customer relationship and account data, throughout the lifecycle
- Integrate strategy, workflow, and an on-demand digital customer experience
- Engage customers on their preferred channels
- Maximize each account's potential, increase payments, and minimize loss write-offs

# Unified Collections

Delivering Centralized Control, From End to End

## Manage Compliance Risk and Industry Change

We never stop innovating to help you adapt to changing regulatory and market conditions with the confidence of compliance and competitive edge. Our solution enables you to manage compliance with current and future regulations through tight automation and a provable, digital audit history. Protect against noncompliant communications and subjective settlements as you drive operational efficiencies.

## One Solution. Three Viewpoints.

Your business strategists, agents, and customers each benefit from an easy-to-access portal tailored to their needs. Strategists set strategy, workflow, and channel communications. Agents manage queues, payments, and program offers. Customers engage in the responsive, on-demand experience they expect and appreciate.

### Key Benefits

Cost effective and fast to deploy

Robust strategy portal to manage unified communications and collections operations

Synchronized and orchestrated views across your business strategists, agents, and customers

State-of-the-art customer portal that is mobile-responsive

Compliance-focused solution

Better customer experience drives increased payment volume
