

## Recovery Accounting

### Post Charge-Off Accounting System of Record

Many lenders with effective collections operations see it all fall apart after they charge off an account. Some sell the debt for pennies on the dollar while others manage their recovery processes manually, unable to yield results they expect. Still others opt to do nothing. Katabat Recovery Accounting automates the post charge-off accounting processes, enabling lenders to efficiently recover more dollars.

### Recoveries Tracked Accurately

Katabat's Recovery Accounting provides lenders with a system of record to manage delinquent customer accounts after they've been charged off. It enables placements with a third party and/or internal account assignment. With a documented account transaction history and clear visibility, you'll stay on the right side of compliance.

### Integrate Recovery & Collections, Seamlessly

Part of Katabat's popular Restore debt-management solution, our Recovery Accounting product is available independently for post charge-off accounts at a fraction of what competitor systems cost. Armed with a powerful strategy engine, you can tailor offers and automate digital communications to maximize debt recovery efforts.

### Recover More on a Single Platform

Efficient recoveries require integrated technology, an understanding of consumer behavior, and compliance with complex legal and regulatory requirements. Recovery Accounting provides you with the ability to increase revenue by accruing and recovering post charge-off debt and leverage legal judgment and probate workflows that keep you compliant.

#### Key Benefits

Accounting system of record with audit functionality.

Cost-effective convenience of an integrated system.

Automated and preference-based digital communications.
